

FUNDAMENTALS OF PSYCHODYNAMIC PSYCHOTHERAPY PRACTICE

Ego Psychology, Self-Psychology & Object Relations Theory

Objective 1

Participants will differentiate between cognitive behavioral therapies (CBT & DBT) and Psychodynamic psychotherapies.

Objective 2

Participants will be able to identify at least three schools of thought within the Psychodynamic Psychotherapies

Objective 3

Participants will be able to describe at least 3 ways that relational theories and practice differ from Classical Freudian Theory and Practice.

Objective 4

Participants will be able to think clinically and theoretically about contemporary psychodynamic practice.

Program Description

Clinicians will increase their theoretical knowledge and technical skill in conducting psychotherapy. Psychotherapy and counseling are both types of mental health treatment but with differences. Psychotherapy focuses more on long-term issues and growth, while counseling aims to help people resolve current issues. Psychotherapy is typically a more in-depth, long-term process that focuses on a person's feelings and past experiences. The aim will be elucidate the confluences and divergences of psychodynamic, psychoanalytic theories and practice. Clinicians will learn the differences between Ego, Self and Object Relations theoretical development. This will help equip them with skills and confidence to enhance and deepen their clinical practice.
